

Assignment- 4

KUBERNITES/DOCKER

Assignment Date	10 November 2022
Student Name	Karthikeyan R
Student Roll Number	910619104038
Maximum Marks	2 Marks

1.Pull an image from docker hub and run it in docker playground.

```
2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
   (amd64)
3. The Docker daemon created a new container from that image which runs the
   executable that produces the output you are currently reading.
4. The Docker daemon streamed that output to the Docker client, which sent it
   to your terminal.

To try something more ambitious, you can run an Ubuntu container with:
$ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
https://hub.docker.com/

For more examples and ideas, visit:
https://docs.docker.com/get-started/

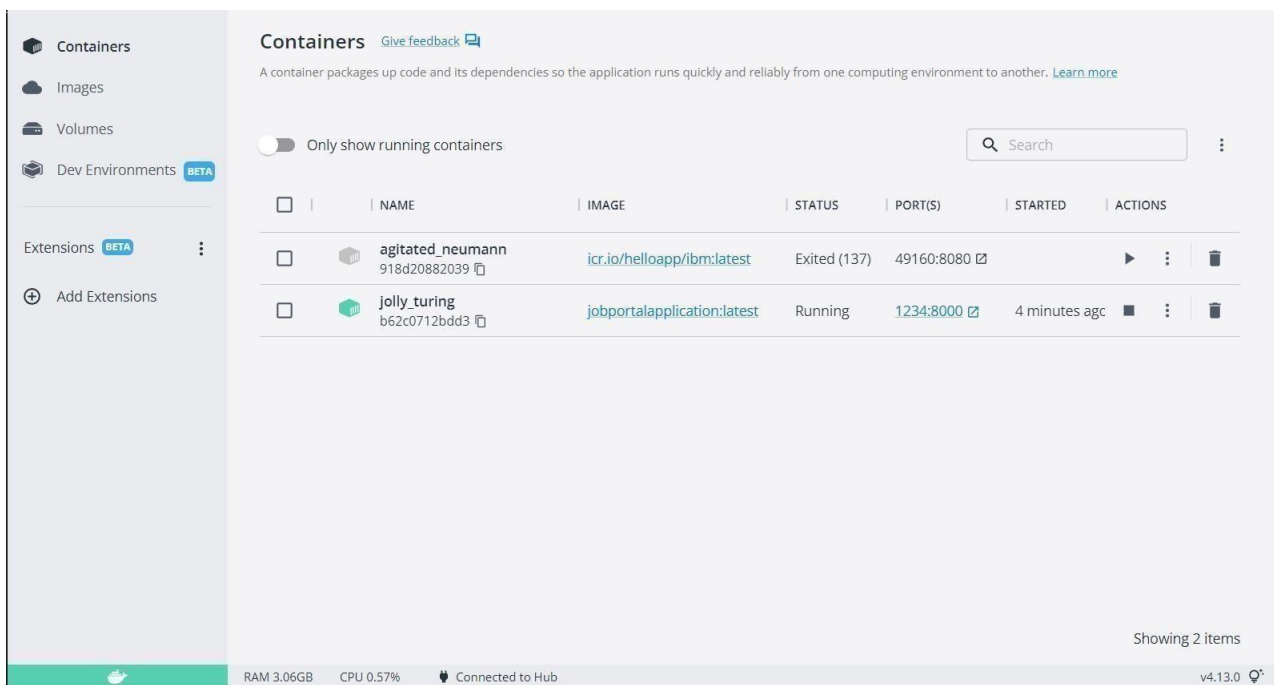

[node1] (local) root@192.168.0.8 ~
$
```

Activate Windows
Go to Settings to activate Windows.

2. Create a docker file for the job portal application and deploy it in Docker desktop application.

```
1 FROM python:3.8-buster
2
3 WORKDIR /app
4
5 COPY requirements.txt /app/
6
7 RUN pip install -r requirements.txt
8
9 COPY . /app/
10
11 RUN cp .env.dev.sample .env
12
13 EXPOSE 8000
14
15 RUN chmod +x entrypoint.sh
16
17 CMD ["sh", "entrypoint.sh"]
```

DEPLOYMENT OF JOBPOTAL APPLICATION:

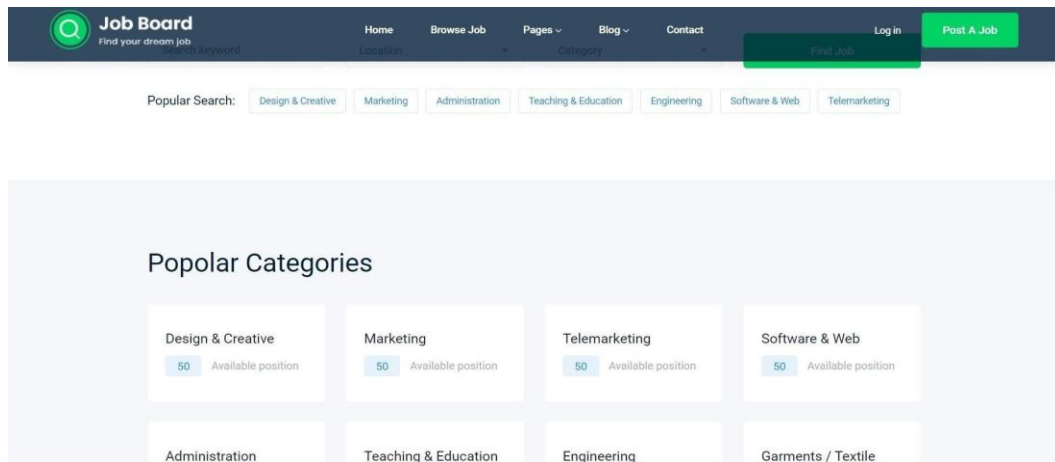

The screenshot shows the Docker Desktop interface. On the left is a sidebar with navigation options: Containers, Images, Volumes, and Dev Environments (marked BETA). Below these are Extensions (BETA) and an Add Extensions button. The main panel is titled 'Containers' and includes a toggle for 'Only show running containers' and a search bar. A table lists the containers:

	NAME	IMAGE	STATUS	PORT(S)	STARTED	ACTIONS
<input type="checkbox"/>	agitated_neumann 918d20882039	icr.io/helloapp/ibm:latest	Exited (137)	49160:8080		
<input type="checkbox"/>	jolly_turing b62c0712bdd3	jobportalapplication:latest	Running	1234:8000	4 minutes ago	

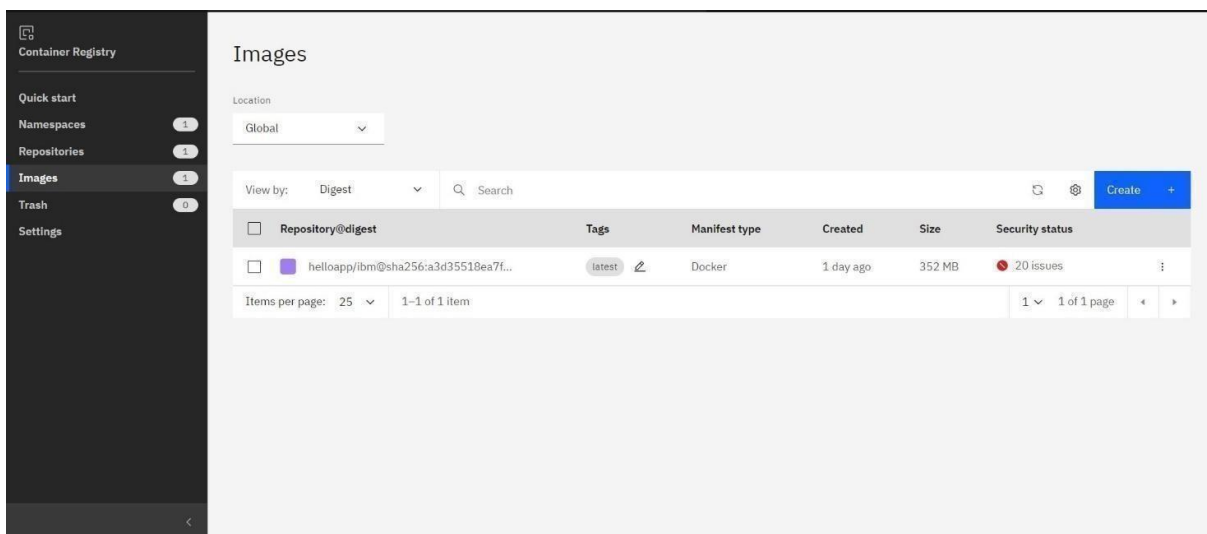

At the bottom, system statistics are shown: RAM 3.06GB, CPU 0.57%, and 'Connected to Hub'. The version 'v4.13.0' is displayed in the bottom right corner.

OUTPUT:

3.Create a IBM container registry and deploy hello-world app or job port app

IBM CONTAINER REGISTRY DEPLOYMENT:

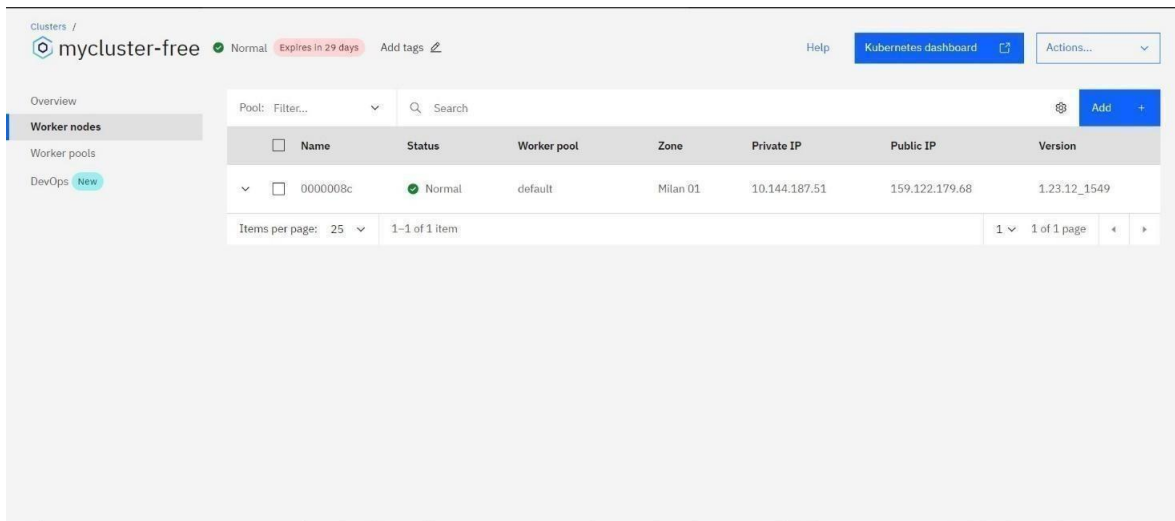

OUTPUT:

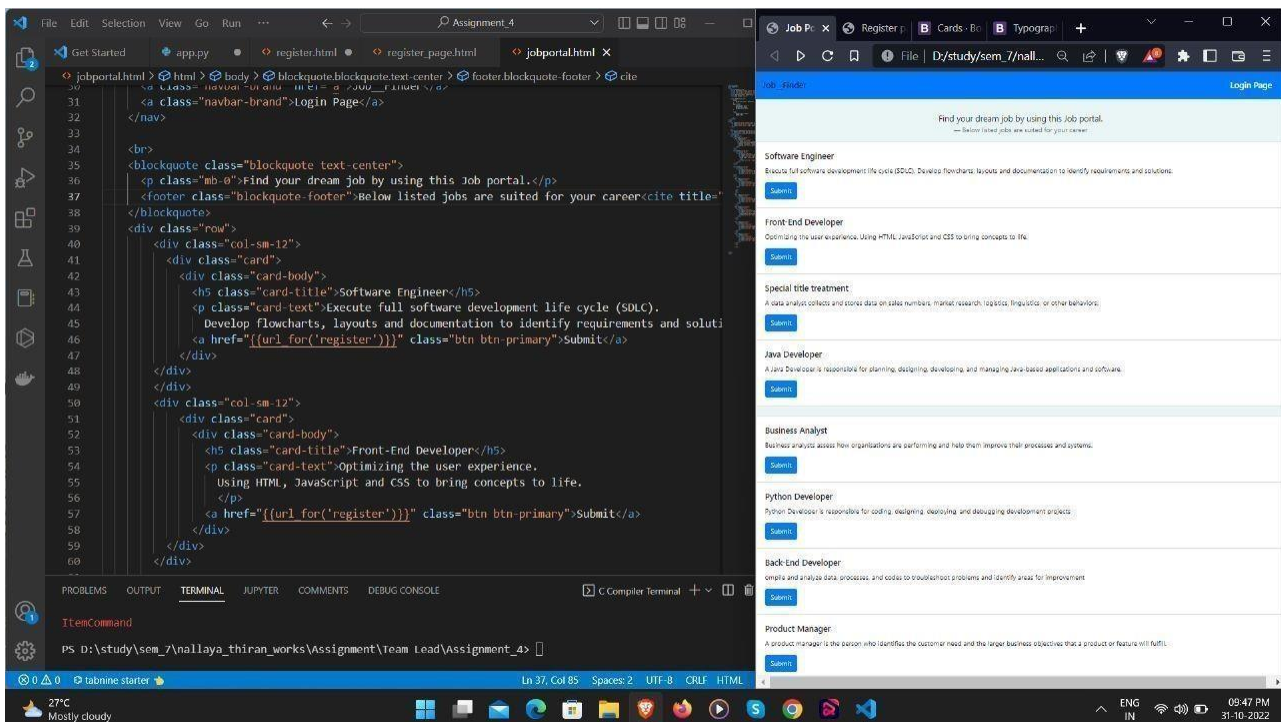

4. Create a Kubernetes cluster in IBM cloud and deploy hello world image or job portal image and expose the same app to run in node port.

Creating Kubernetes cluster in IBM cloud and exposing node port:

Name	Status	Worker pool	Zone	Private IP	Public IP	Version
0000008c	Normal	default	Milan 01	10.144.187.51	159.122.179.68	1.23.12_1549

Output:

```
31 <a class="navbar-brand">Login Page</a>
32 </nav>
33
34 <br>
35 <blockquote class="blockquote text-center">
36 <p class="mb-0">Find your dream job by using this job portal.</p>
