Team ID	PNT2022TMID11437
Project Name	Project – Personal Expense Tracker Application
Maximum Marks	4 Marks

Flask - Flask is a micro web framework written in Python. It is classified as a micro-framework because it does not require particular tools or libraries. It has no database abstraction layer, form validation, or any other components where pre-existing third-party libraries provide common functions.

IBM Db2 - Db2 is a family of data management products, including database servers, developed by IBM. It initially supported the relational model, but was extended to support object–relational features and non-relational structures like JSON and XML.

SendGrid - SendGrid is a cloud-based SMTP provider that **allows you to send email without having to maintain email servers**. SendGrid manages all of the technical details, from scaling the infrastructure to ISP outreach and reputation monitoring to whitelist services and real time analytics.
